

Every single home will become a smart home.

Top Provider of Smart Home Solutions

LifeSmart is among the top brand list to provide smart home products and solutions on the global market. We offer complete categories of smart devices, integrating advanced IoT technologies and cloud services, to form the base of both smart home solutions and other industrial solutions.

Awards

LifeSmart has always adhered to the modern minimalist design style where technology and beauty coexist. We pursue the balance of design, user experience and product functions.

Since 2016, our products have won more than 50 international awards including the grand slam of the world's top design awards.

Protocols

CoSS - a wireless communication protocol that is as stable as a wired network

Communication of Smart Star Network (CoSS) is a new IoT communication protocol independently developed by LifeSmart to achieve communication interconnection and automation for IoT devices. CoSS adopts wireless connection technologies comparable to wired connection technologies.

Specially designed for IoT, CoSS defines the communication model, data structure, and interaction format on the physical layer, link layer, and application layer; In CoSS, the design for RF communication is optimized, which greatly simplifies product development processes. The model integrity is maintained, as well as the simplicity and stability of the protocol, providing a solid basis for the management and intellectualization of devices.

800
m

Long Distance

Transmission of 800 meters

≤100
ms

Low Power Consumption

Ensuring 12 to 24 months of operating time for devices

Low Radiation

1/100,000 of the radiation from a cellphone

High Stability

Telecom-level communication standard

High Security

Restricted access and multiple encryption

500

Large Capacity

Support up to 500 sub-devices

Protocols

We Are The Brand Supporting the Most Wireless Communication Protocols on the Market

In the field of IoT, we firmly believe that the future belongs to wireless communication protocols.

We always take customers' value as our top priority and select the wireless communication protocols that are most suitable for users' cases. We provide products supporting the most protocols on the market, including Wi-Fi, BLE, Zigbee, Z-Wave, and our independently developed CoSS. For video-related applications and some smart products, we use Wi-Fi. For personal consumer electronics, we use Bluetooth or a combination of Bluetooth and Wi-Fi. Granted with the Z-Wave Security S2 certification in Japan, we are the first Chinese company to receive this certification.

AI Builder

AI Builder: Bringing Intelligent Editing to a Higher Level

LifeSmart AI Builder is an intelligent editor supporting any condition combinations + any device execution actions. You can use the editor in graphic and list mode.

For example, multiple intelligent agents usually need to be created for an intelligent scenario where "the light and air conditioner need to be turned on when people show up during work hours, the light needs to be adjusted for the lunch break, and the light and air conditioner need to be automatically turned off after working hours or during holidays".

However, with LifeSmart AI Builder, you only need to create one intelligent agent to realize such a complicated multi-condition logic and stable operation.

Product Category - Smart Station

Smart Station

Smart Station

Smart Station is the gateway to LifeSmart smart home ecosystem. As the core of the LifeSmart platform, the Smart Station connects all of the smart devices wirelessly. With its powerful processor, the Smart Station can connect up to 500 smart devices.

DEFED Smart Station

DEFED Smart Station is a powerful multi-protocol gateway, which supports six wireless communication protocols, namely, CoSS, ZigBee, Z-Wave, BLE, Wi-Fi, and 2G/3G/4G/5G. It supports various power supply modes, such as the backup battery, DC power, and power over Ethernet (PoE), it supports plug and play (PnP), and it can also be mounted on a wall. It is a super IoT gateway that truly realizes availability when turned off and off-grid configurability.

Product Category - Smart Interaction

Nature Series All-in-one Smart Control Panel

Nature

Nature all-in-one smart control panel redefines the smart home interaction experience, which not only acts as the control center, but also has the ability to integrate video intercom, message pushing and surrounding business, promoting the realization of digital transformation in the real estate industry.

Nature Mini Pro / Nature Mini L

Nature Mini Pro / Nature Mini L is a multi-functional switch panel for smart home control, with its 3.94"/4" IPS ultra HD multi-color screen, it allows you to control all the smart devices in your home.

Meanwhile, it can be used as a gateway that supports various wireless protocols such as CoSS, ZigBee, BLE, and 2.4 GHz and 5 GHz dual-band Wi-Fi.

Nature 7

Nature 7 all-in-one smart control panel is equipped with both HD touch screen and physical scenario buttons to trigger the scenario modes and smart device control functions with just one button. It comes with a 86 standard mounting box for easy installation.

Product Category - Smart Lighting

BLEND Smart Switch

BLEND Smart Switch is a push-button smart switch with 16-million-color streaming light strips, supporting various functions including voice control, mobile phone remote control, and timer switch.

Nature Switch

Nature Switch is a touch smart switch with millisecond response and a wear-proof and easy-to-clean glass panel. It supports 16-million-color magic light and personalized customization of icons.

Starry Switch

Starry Switch is the first smart switch that fundamentally solves the stability problem of the mono-ignition switch in the smart home industry, characterized by ultra-long battery life, stability and durability, and comfortable touch.

Moonstone Switch

Moonstone switch is a touch smart switch that supports customized 16-million-color magic light as well as dual control and multiple control.

Product Category - Smart Lighting

Moonstone Switch 120

Moonstone switch is a touch smart switch that supports customized 16-million-color magic light as well as dual control and multiple control.

Polar Switch

Polar Switch adopts extremely low power consumption technology and independent power supply. It supports single live line, null and live line and low direct current ($\leq 30V$).

Product Category - Smart Lighting

CUBE Clicker

CUBE Clicker can be installed or placed anywhere, not only to control the lights but also to trigger various smart scenarios with one click.

CUBE Switch Module

CUBE Switch Module is small and easy to install. It is suitable for 99% of traditional switches in the market such as 80, 86, 118, and 120 standard switches. By installing it into the switch mounting box, it can turn traditional switches into smart ones and realize functions including remote control, smart linkage, timer switch, and voice control.

Dimmer & Motion Sensor Switch

Dimmer & Motion Sensor Switch integrates light control, motion detection, illuminance detection together into one device. It supports multiple ways of lighting adjustment, precise brightness control, and automatic control by motion detection.

Dimmer Controller (0-10V)

LifeSmart Two Channel Dimmer Controller(0-10V) can form a complete dimming and color temperature solution with LifeSmart Smart Station, 0-10V dimming light and the driving. With other LifeSmart products, it can realize intelligent linkage, timing switch, soft change and other functions.

Product Category - Home Security

DEFED Alarm Kit

- Anti-tamper Design for All Devices
- GSM Alarm Message
- Millisecond Response
- Power-off Prevention
- Compatible with 3rd-party Cameras
- Integrate with Other Smart Home Devices

Product Category - Home Security

DEFED Motion Sensor

DEFED Motion Sensor supports an ultra-long dynamic sensing range of up to 12 meters, displaying the current sensing state with its dual-color LED indicator.

DEFED Indoor Siren

DEFED Indoor Siren is an indoor wireless sound alarm. When the alarm system detects an abnormal situation, it emits a high volume alarm sound up to 109 decibels.

DEFED Door/Window Sensor

DEFED Door/Window Sensor is a new type of security-based sensor that detects the open or closed state of doors/windows. As it is slender, it can be applied to multiple types of windows and doors.

DEFED Key Fob

DEFED Key Fob is a remote control device for the DEFED alarm system that is portable to set up scenarios freely. With the indicator feedback mechanism, you can accurately get to know the execution of the current instructions.

Product Category - Home Security

CUBE Motion Sensor

CUBE Motion Sensor can monitor abnormal human body movement and light intensity in the controlled area by infrared induction, and link the alarm for security monitoring.

CUBE Environmental Sensor

CUBE Environmental Sensor is equipped with a visual LCD screen to monitor real-time indoor temperature, humidity and illumination, and can link other smart devices to achieve automatic adjustment of temperature and illumination.

Water Leak Sensor

Water Leak Sensor monitors water safety at home in real time, sends warning notifications to users immediately in case of leakage, and automatically closes the valve with a mechanical hand.

CUBE Door/Window Sensor

CUBE Door/Window Sensor provides real-time feedback on the open and close status of doors and windows.

Product Category - Home Security

Gas Sensor

Gas Sensor detects combustible gases. When the gas concentration is abnormal, Gas Sensor will immediately issue an alarm sound and notify users via the mobile APP. In addition, it can also link devices such as the fresh air system and air purifier to improve indoor air quality.

Environment Sensor(CO₂)

Environment Sensor(CO₂) detects the carbon dioxide concentration in your room. It uses industrial-grade sensors for real-time detection and also supports remote viewing on LifeSmart APP.

Motion Sensor - AAA

Motion Sensor - AAA combines PIR Technology and light detection, it can monitor abnormal human body movement and light intensity within 120 degrees.

Formaldehyde Sensor

Formaldehyde Sensor detects the formaldehyde index in your room and notify you via LifeSmart app when formaldehyde index exceeds the threshold value.

Product Category - Home Security

Indoor Camera

Indoor Camera supports functions such as day and night HD imaging, two-way intercom, and intelligent linkage, and realizes 360° remote monitoring with no blind spots by pan-tilt set, so that users can view their home from mobile phone wherever they are.

Outdoor Camera

Outdoor Camera supports functions such as day and night HD imaging, sound and light alert, two-way intercom, abnormal movement shooting, water-proof and dust-proof, and remote monitoring to effectively ensure the safety of the gate and courtyard for your home.

Smart Doorlock

Smart Door Lock (Classic) utilizes an independent encryption safety zone and a new type fingerprint acquisition device. It not only enhances the security performance of the door lock but also improves user experience and guarantees user privacy security.

Product Category - Smart Shading

Smart Curtain Motor

Smart Curtain Motor can replace the traditional curtain track, turning it into a smart curtain that supports smart control, timer switch, and accurate control by percentage.

QuickLink Curtain Motor

QuickLink Curtain Motor is a smart curtain motor that supports the curtain track length adjustment. It is easy to install and caters to the needs of intelligent transformation of renovated homes.

Tubular Motor

Tubular motor is a smart motor specially designed for roller blinds. After being connected to the LifeSmart smart home system, it can support functions such as remote control, timing switch, and accurate control by percentage.

MINS Curtain Motor Controller

MINS Curtain Motor Controller can easily transform a traditional curtain motor into a smart curtain motor without breaking the wall or additional wiring.

Product Category - Smart Thermostats

Nature Mini Pro (Thermostats)

Nature Mini Pro (Thermostats) is a temperature control panel that integrates fresh air with underfloor heating and supports 5 temperature control system modes, namely, fan-coil unit + water underfloor heating, fan-coil unit (single valve), fan-coil unit (double valves), water underfloor heating, or fresh air.

Smart Central Air-conditioning Gateway

Smart Central Air-conditioning Gateway can offer additional smart control functions to traditional central air conditioning and connect LifeSmart home-wide system to realize remote control, timer switch, power monitoring, and smart linkage.

Thermostatic Radiator Valve

Thermostatic Radiator Valve is used in traditional water heating systems. In addition to displaying accurate temperature on the LCD screen, it can also realize remote control, power consumption monitoring, individual control in each room, and timer switch/temperature control.

Product Category - Energy Management

Smart Plug
(CoSS CN)

Smart Plug
(ZigBee US)

Smart Plug
(ZigBee UK)

Smart Plug
(CoSS EU&FR)

LifeSmart Smart Plug is easy to pair, supports plug and play, remote control, energy consumption monitoring and timer switch. It is equipped with safety housing made of flame retardant materials.

Product Category - Energy Management

RS485 Converter

RS485 converter can convert 485 signals into CoSS signals, thereby integrating third-party devices such as air conditioners and fresh air system into the LifeSmart smart home system.

General Controller

General Controller can integrate third-party devices such as electric curtains and window openers into the LifeSmart smart home system through weak current to achieve smart control.

Product Category - Smart Entertainment

SPOT

SPOT is a universal infrared remote controller with magical color-changing appearance. It can control any infrared equipment such as the TV, air conditioner, fan, and set-top box. You can realize intelligent control and multi-scene intelligent linkage of various electrical appliances in your home through SPOT.

SPOT Mini

SPOT Mini is a mini universal infrared remote controller with a smaller size and wider coverage than SPOT.

Solutions & Success Stories - Smart Residence

Beijing Winter Olympic Village

The Beijing Winter Olympic Village, located on the south side of the Beijing Olympic Sports Center, is an important venue in the event site of the Beijing 2022 Winter Olympics. Consist of 20 residential buildings with a total construction area of 330,000 square meters, it will be the place offering residential, catering, and medical services to athletes and team officials during the event. After the event, it will be reconstructed to serve the public rental housing project in Beijing, for talents complying with the functional strategic positioning of the capital.

As the nominated supplier of the smart home solution for the Beijing 2022 Winter Olympics, LifeSmart equips the Beijing Winter Olympics Village with the full smart home solutions integrating smart curtains, smart plugs, door/window sensors, motion sensors, smart HVAC, and smart lighting. These solutions create residential environments featuring comfortability, safety, intelligence, and energy efficiency.

Solutions & Success Stories - Smart Residence

Together with our partners, LifeSmart has completed large-scale deliveries of multiple real estate projects around the world.

In the domestic market, LifeSmart has also reached long-term strategic cooperation with high-end real estate companies to provide them with a complete set of smart home solutions.
